

2022 REQUEST FOR PROPOSALS FOR GPCAH PILOT/FEASIBILITY PROJECTS ACADEMIC TRACK

SEPTEMBER 2022

GPCAH Mission and Program Objectives

The Great Plains Center for Agricultural Health (GPCAH) is dedicated to protecting the health and safety of farmers, ranchers, farm workers, their families, and agricultural community members in the Midwest and beyond. The goals of the Center are achieved through basic and applied research, education and training, community outreach, and translation of research findings into effective interventions **for the prevention of injury and illness resulting from agricultural work exposures**. The GPCAH is one of 11 National Institute for Occupational Safety and Health (NIOSH)-funded Centers for Agricultural Safety and Health.

The objective of the GPCAH Pilot/Feasibility Projects Program is to support new agricultural health and safety research, prevention, intervention, community outreach, and translation projects likely to lead to more comprehensive projects or activities. We support research projects that address occupational hazards relevant to farmers and farm workers in our nine-state region (IA, IL, IN, KS, NE, MO, MN, OH, & WI). ***Pilot projects addressing work-related stress and mental health, the prevention of slips, trips and falls, machine safety, and chemical safety are especially encouraged.***

Deadlines and Awards

Complete applications must be received by **5pm (central time) on Thursday, December 1, 2022**. See “Application Submission Procedure”, below, for additional details.

Applicants may request funding up to **\$30,000** in total costs (i.e., direct plus indirect costs). See “Funding and Budget Considerations”, below, for additional details.

All pilot grant awards are conditional on the availability of funds allocated by the federal government to the GPCAH.

Applicants may propose a project duration of no more than 18 months. The earliest start date is anticipated to be February 1, 2023.

Applicants will be notified of funding status within 60 days following the due date for proposals. **The release of funds to applicant organizations is contingent upon compliance with federal regulations.** Investigators are encouraged to initiate as soon as possible any applicable human subjects research determination and/or review processes with an Institutional Review Board (IRB). Please contact Jenn Patterson (jennifer-j-patterson@uiowa.edu), GPCAH Center Coordinator, with questions regarding IRB procedures.

Eligibility for Academic Track Applications

All persons with an interest in agricultural health or safety and appropriate knowledge, skills, and resources are invited to collaborate with an “eligible institution” to prepare an application. “Eligible institutions” include 1) for-profit, non-profit, and public or private institutions, 2) units of local or state government and eligible federal agencies, 3) units of local and state tribal government, and 4) faith- or community-based organizations.

We are accepting pilot project proposals from within our nine-state region (IA, IL, IN, KS, MN, MO, NE, OH, WI). Projects from outside this region will be considered to the extent that they address agricultural safety and health issues of relevance to our region. Individuals from underrepresented racial and ethnic groups as well as individuals with disabilities are especially encouraged to apply.

Academic Projects

The GPCAH encourages applications from new academic/scientific investigators (including graduate students) and those newly interested in agricultural safety and health research. Such investigators are encouraged to apply in collaboration with experienced health scientists. Applications from all investigators will be reviewed, however, regardless of applicant seniority. If the principal investigator is a student, a faculty advisor must be identified. The review criteria for academic track applications emphasize scientific rigor, innovation, and the potential to secure additional funding in the future. Academic projects should have at least one specific research question directed toward the prevention of illness and injury resulting from agricultural work exposures. Many topics and research types (i.e., basic/etiologic, surveillance, intervention, research translation) will be considered. However, applicants must describe how their projects address NIOSH priority goals for extramural research within the Agriculture, Forestry and Fishing (AFF) sector (<https://www.cdc.gov/niosh/programs/prioritygoals.html>).

Funding and Budget Considerations

The maximum permitted budget is **\$30,000** (direct plus indirect costs).

Direct costs are those explicitly allocated to the project, including: salary and fringe for project team members, supplies, equipment, data collection and analyses, and travel associated with executing the project. However, no meeting/conference travel can be covered unless attendance is required to perform project activities. Additional information should be provided within the budget justification for select items of cost, including:

Equipment in excess of \$5,000 – must be project-specific, fully justified, directly allocable to the project, and necessary for completion of aims.

Technological/IT equipment (e.g., computers, iPads, phones, wearable devices, and the like) – must be project-specific, fully justified, directly allocable to the project, and necessary for completion of aims.

Software or software licenses – must be project-specific and necessary for completion of aims.

Research-related food/meals – must be directly related to completion of aims; food for meetings/conferences is not allowed.

Indirect costs (also referred to as “facilities and administrative” costs, or F&A) are infrastructure and/or overhead costs not directly related to the project. Institutions of higher education frequently negotiate an indirect cost rate with the federal government. Please use the following guidance:

If the project director is affiliated with the University of Iowa, indirect costs should not be included.

Project directors affiliated with other institutions of higher education with a negotiated indirect cost rate are encouraged to discuss with appropriate institution officials the indirect cost rate that will be applied. In the past, many applicants have received waivers or reductions in the indirect cost rate from their institution. In any case, please provide evidence supporting the indirect cost rate to be applied to the project, for example, by providing a link in the budget justification to the institution’s indirect cost guidelines or a letter from an institutional official authorizing a waiver or reduction in indirect costs.

Project directors affiliated with organizations without a negotiated indirect cost rate should apply indirect costs at a maximum rate of 10% of the project direct costs (i.e., the *de minimus* rate). For example, if the direct costs are \$20,000, then the indirect costs should be at most \$2,000, for a total cost of \$22,000.

Project directors are strongly encouraged to contact Mindy Sickels Sterbenz (mindy-sickels@uiowa.edu) for additional guidance in preparing budgets.

Review Process

Pilot project grant applications will be evaluated by a review panel of experts both internal and external to the GPCAH. Reviewers follow procedures similar to those used by federal scientific review panels (see <http://grants.nih.gov/grants/guide/notice-files/not-od-09-024.html>) and will consider priorities expressed in the “Priorities” section of CDC NIOSH RFA-OH-22-002-11-022 (<https://grants.nih.gov/grants/guide/rfa-files/RFA-OH-22-002.html>). A written critique will be provided to the principal investigators of all pilot grant applications deemed responsive to this request for proposals, regardless of funding decision.

Review criteria for academic projects are appended to this request for proposals.

Reporting Requirements

The principal investigator of each funded project is required to provide the following reports:

- Mid-project – brief written progress report
- Final – detailed final project progress report
- Annual impact survey – for four years following project completion, the principal investigator will be asked to respond to a brief survey to evaluate the ongoing impact of the funded project. The survey will ask about (1) long-term outcomes, (2) presentations, publications, or other products resulting from the project not previously reported, (3) professional collaborations established as a result of GPCAH support, and (4) additional grants and contracts resulting from the project (i.e., that project results led to or supported an application for funding)

Funded investigators will receive detailed instructions for completing the required reports listed above.

Publications, journal articles, presentations, and similar works relating to GPCAH-supported community partnering projects are required to include the following statement: *“This [publication, journal article, presentation, etc.] was supported, in part, by grant number U54 OH007548 from Centers for Disease Control and Prevention (CDC) / National Institute for Occupational Safety and Health (NIOSH). Its contents are solely the responsibility of the authors and do not necessarily represent the views of the CDC, NIOSH, or the Great Plains Center for Agricultural Health.”*

To comply with the CDC’s public access policy, all peer-reviewed manuscripts resulting from GPCAH funding MUST be deposited into PubMed Central using the NIH Manuscript Submission system.

Application Format and Content

Proposals should include the following sections:

Required Sections:	Page Limit
1) Cover letter Include project title Signed and written on organization letterhead Please include 1-2 sentences about the project's potential impact	1
2) Front page Date, title, investigator name and contact information (phone number, email address, and affiliation), and a brief project summary (150-word limit) By submitting this proposal, you agree to the following (<u>which must appear on the front page of your application</u>): <i>This pilot grant application is not currently under review by any other grant administering program. If I submit this pilot grant application (or an application with similar aims) to another funder while it is under review by GPCAH, I will notify GPCAH. I understand that failure to comply with this policy is grounds for rejection of the application and withdrawal of any funds that may be awarded.</i>	1
3) Research plan (academic projects) A) Introduction (required for revised versions of previously submitted applications) ¹ B) Specific aims C) Significance and innovation ² D) Approach	1 (for part A) } 5 (for parts B-D)
¹ If submitting a revised version of a previously submitted application, please explain how the application has been modified to address reviewers' critiques.	
² Part C should address "burden, need and impact" as defined by NIOSH (https://www.cdc.gov/niosh/programs/bni.html) and describe how the project addresses NIOSH priority goals for extramural research in Agriculture, Forestry and Fishing (AFF) (https://www.cdc.gov/niosh/programs/prioritygoals.html).	
4) Potential for future funding and plans for dissemination of results	1
5) References	No page limit
6) Budget and budget justification	No page limit
7) Timeline and milestones	1
8) Biographical sketch (applicants should use current NIH biosketch formatting)	5 (per Investigator)
9) Letters of Support Include letters of support from collaborators affirming their expected contributions toward completing the project aims. Letters of support from persons without a specific, defined role in the project will be removed from the application prior to review. If the PI is a student/trainee, the application must include a letter of support from a faculty advisor.	No page limit
10) Appendices Items may include draft surveys/questionnaires, background information on web tools or smartphone apps, training materials, maps, etc. Note, however, that reviewers are not required to read appendices.	No page limit

Application Submission Procedure

Email both the signed cover letter and one complete PDF version of the full proposal to jennifer-j-patterson@uiowa.edu. When submitting your application, you must:

- Include the phrase “GPCAH Pilot Grant Submission” in the subject line of the pilot grant proposal submission email.
- Check for a confirmation email from the GPCAH Center Coordinator to ensure receipt of your email. If this does not happen within one week, call the Pilot/Feasibility Projects Program Director, Nate Fethke, at 319-467-4563.

YOUR APPLICATION HAS NOT BEEN RECEIVED IF YOU DO NOT GET A CONFIRMATION EMAIL.

Scored Review Criteria

Significance

1. Does the project address an important agricultural health and safety problem or a critical barrier to the prevention of illness or injury of agricultural workers?
2. If the aims of the application are achieved, how will scientific knowledge, academic technical capability, and/or agricultural health and safety practice be improved?
3. How will successful completion of the aims change the concepts, methods, technologies, services, or preventive interventions that drive this field?

Investigators

1. If the PI is an early stage investigator (such as a graduate student) or a new investigator (such as a junior faculty member), do they have appropriate training relative to the project aims?
2. If the PI is a graduate student, does the faculty advisor have a record of successful research mentorship?
3. If the PI is an established investigator but new to agricultural safety and health research, have they demonstrated a record of advancing scientific knowledge in their primary research area?
4. Are all skills required for project success represented among the research team members?

Innovation

1. Does the application challenge and seek to shift current research or agricultural health and safety practice paradigms by using novel theoretical concepts, approaches or methodologies, instrumentation, or interventions?

Approach

1. Are the overall strategy, methodology, and analysis methods well-reasoned and appropriate to accomplish the specific aims of the project?
2. Are potential problems, alternative strategies, and benchmarks for success presented?
3. If the project is in the early stages of development, will the strategy establish feasibility and will particularly risky aspects be managed?

Environment

1. Will the scientific environment in which the work will be done contribute to the likelihood of success?
2. Are the institutional support, equipment and other physical resources available to the investigators adequate for the project proposed?

3. Will the project benefit from unique features of the scientific environment, subject populations, or collaborative arrangements?

Additional Review Criteria (not scored but considered with respect to overall project impact)

1. Are the budget and time to completion justified and reasonable in relation to the scope of work proposed?
2. If the application is revised from a previous version, were the reviewers' critiques adequately addressed?
3. Does the applicant describe potential for future extramural funding?
4. Does the proposal enhance the reach of the GPACH through collaboration with regional stakeholders and/or institutions without prior connections to the center?
5. Does the applicant describe plans to disseminate the results and for continued reporting of related work?
