

2023 CALL FOR PILOT GRANT APPLICATIONS

RFP now available

GPCAH funds pilot projects (up to \$30,000 per project) intended *to promote innovative outreach and research efforts to prevent agricultural injury and illness.*

Projects must target agricultural injury and illness prevention to help improve safety and health among agricultural communities in our Midwest region.

TARGET AUDIENCE

The pilot program supports both *community-based organizations* (staff who are creating new ag safety and health knowledge and/or assessing and promoting best safety and health practices) and *academic researchers*, especially new investigators and trainees.

IMPORTANT DATES

May 15: Community project concept due
July 3: Deadline for applications.

APPLY NOW!
