<i>INSPECTION DATE / REPAIR DATE</i>					
<i>ITEM REPAIRED</i>	<i>OK</i>	<i>NR</i>	<i>OK</i>	<i>NR</i>	<i>OK</i> / <i>NR</i>
PROCEDURES TO COMPLETE WITH ENGINE OFF, KEY OUT					
Tires: Are they properly inflated according to the operator's manual? Check tires for cuts or breaks in the tread or sidewalls.					
Three Point Hitch Assembly: Is any attached or mounted equipment securely fastened?					
Engine Oil: Is the engine oil at the appropriate levels?					
Engine Coolant: Is the engine coolant at the appropriate levels?					
Are there any signs of leaks from hydraulics or transmission?					
Battery: Are battery terminals free of corrosion and in good condition?					
PTO: Are the PTO master shields in place and in working condition?					
Hitch: Are pins and bolts in proper place?					
Fuel Supply: Is the fuel tank full and securely fastened?					
If Operating on Public Roads: Is SMV sign clean and visible? Are turn signals in working condition?					
Are windows, handrails, steps and platform clean, clear of trash or other items and in good condition?					
If Operating a Tractor with Foldable ROPs: Are ROPs correctly positioned? If not in a low clearance situation, ROPs should be in upright position and properly fastened.					
Walk around the tractor and attached implement to visually check for any objects or individuals that may be in close proximity prior to mounting the operator's platform.					
Operator's Seat: Check seat adjustment and securely fasten seatbelt.					
PROCEDURES TO COMPLETE WITH KEY ON					
Check Gauges and Instruments:					
Are oil and battery lights working properly?					
Is the engine temperature gauge in working condition?					
Is the hour meter in working condition?					
Standard Equipment:					
Is the steering in working condition?					
Are the front, tail, brake and turn signal lights in working condition?					
Is the horn working properly?					
PROCEDURES TO COMPLETE WITH THE ENGINE RUNNING					
Are windshield wipers working properly?					
Are breaks working properly? Is the parking brake in working condition?					
Is the hoist operation in working condition?					
*Check all other items listed in operator's manual as recommended.					

NR = Needs Repair

- If the tractor is found to be unsafe, the condition must be reported immediately to the supervisor for repair. Repair must be completed prior to operation of the tractor.
